Project Title: Augmented Reality Website

I'd like to build this as a long page website

p1) AR/Introduction – Introduce concept of AR by having users swipe right to augment the picture with virtual visuals and drop 'Augmented' on top of 'Reality'

p2) Definition and history of AR and associated hardware

p3) Possible applications:

- entertainment: video games, live events, portable screens, museums
- workplace: architects, doctors, any workplace
- commerce
- education

p4) Sources – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
